*Doing Business 2020 Indicators
(in order of appearance in the document)*

| | |
|--|--|
| Starting a business | Procedures, time, cost and paid-in minimum capital to start a limited liability company |
| Dealing with construction permits | Procedures, time and cost to complete all formalities to build a warehouse and the quality control and safety mechanisms in the construction permitting system |
| Getting electricity | Procedures, time and cost to get connected to the electrical grid, and the reliability of the electricity supply and the transparency of tariffs |
| Registering property | Procedures, time and cost to transfer a property and the quality of the land administration system |
| Getting credit | Movable collateral laws and credit information systems |
| Protecting minority investors | Minority shareholders' rights in related-party transactions and in corporate governance |
| Paying taxes | Payments, time, total tax and contribution rate for a firm to comply with all tax regulations as well as postfiling processes |
| Trading across borders | Time and cost to export the product of comparative advantage and import auto parts |
| Enforcing contracts | Time and cost to resolve a commercial dispute and the quality of judicial processes |
| Resolving insolvency | Time, cost, outcome and recovery rate for a commercial insolvency and the strength of the legal framework for insolvency |
| Employing workers | Flexibility in employment regulation and redundancy cost |

About Doing Business

The *Doing Business* project provides objective measures of business regulations and their enforcement across 190 economies and selected cities at the subnational and regional level.

The *Doing Business* project, launched in 2002, looks at domestic small and medium-size companies and measures the regulations applying to them through their life cycle.

Doing Business captures several important dimensions of the regulatory environment as it applies to local firms. It provides quantitative indicators on regulation for starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency. *Doing Business* also measures features of employing workers. Although *Doing Business* does not present rankings of economies on the employing workers indicators or include the topic in the aggregate ease of doing business score or ranking on the ease of doing business, it does present the data for these indicators.

By gathering and analyzing comprehensive quantitative data to compare business regulation environments across economies and over time, *Doing Business* encourages economies to compete towards more efficient regulation; offers measurable benchmarks for reform; and serves as a resource for academics, journalists, private sector researchers and others interested in the business climate of each economy.

In addition, *Doing Business* offers detailed [subnational studies](#), which exhaustively cover business regulation and reform in different cities and regions within a nation. These studies provide data on the ease of doing business, rank each location, and recommend reforms to improve performance in each of the indicator areas. Selected cities can compare their business regulations with other cities in the economy or region and with the 190 economies that *Doing Business* has ranked.

The first *Doing Business* study, published in 2003, covered 5 indicator sets and 133 economies. This year's study covers 11 indicator sets and 190 economies. Most indicator sets refer to a case scenario in the largest business city of each economy, except for 11 economies that have a population of more than 100 million as of 2013 (Bangladesh, Brazil, China, India, Indonesia, Japan, Mexico, Nigeria, Pakistan, the Russian Federation and the United States) where *Doing Business* also collected data for the second largest business city. The data for these 11 economies are a population-weighted average for the 2 largest business cities. The project has benefited from feedback from governments, academics, practitioners and reviewers. The initial goal remains: to provide an objective basis for understanding and improving the regulatory environment for business around the world.

| Cost (% of estate) | 4.2 |
| Outcome (0 as piecemeal sale and 1 as going concern) | 1 |
| Strength of insolvency framework index (0-16) | 13.0 |

Starting a Business

This topic measures the number of procedures, time, cost and paid-in minimum capital requirement for a small- to medium-sized limited liability company to start up and formally operate in each economy's largest business city.

To make the data comparable across 190 economies, *Doing Business* uses a standardized business that is 100% domestically owned, has start-up capital equivalent to 10 times the income per capita, engages in general industrial or commercial activities and employs between 10 and 50 people one month after the commencement of operations, all of whom are domestic nationals. Starting a Business considers two types of local limited liability companies that are identical in all aspects, except that one company is owned by 5 married women and the other by 5 married men. The ranking of economies on the ease of starting a business is determined by sorting their scores for starting a business. These scores are the simple average of the scores for each of the component indicators.

The most recent round of data collection for the project was completed in May 2019. [See the methodology for more information.](#)

| What the indicators measure | Case study assumptions |
|--|---|
| <p>Procedures to legally start and formally operate a company (number)</p> <ul style="list-style-type: none"> • Preregistration (for example, name verification or reservation, notarization) • Registration in the economy's largest business city • Postregistration (for example, social security registration, company seal) • Obtaining approval from spouse to start a business or to leave the home to register the company • Obtaining any gender specific document for company registration and operation or national identification card | <p>To make the data comparable across economies, several assumptions about the business and the procedures are used. It is assumed that any required information is readily available and that the entrepreneur will pay no bribes.</p> |
| <p>Time required to complete each procedure (calendar days)</p> <ul style="list-style-type: none"> • Does not include time spent gathering information • Each procedure starts on a separate day (2 procedures cannot start on the same day) • Procedures fully completed online are recorded as ½ day • Procedure is considered completed once final document is received • No prior contact with officials | <p>The business:</p> <ul style="list-style-type: none"> -Is a limited liability company (or its legal equivalent). If there is more than one type of limited liability company in the economy, the limited liability form most common among domestic firms is chosen. Information on the most common form is obtained from incorporation lawyers or the statistical office. -Operates in the economy's largest business city. For 11 economies the data are also collected for the second largest business city. -Performs general industrial or commercial activities such as the production or sale to the public of goods or services. The business does not perform foreign trade activities and does not handle products subject to a special tax regime, for example, liquor or tobacco. It is not using heavily polluting production processes. -Does not qualify for investment incentives or any special benefits. -Is 100% domestically owned. -Has five business owners, none of whom is a legal entity. One business owner holds 30% of the company shares, two owners have 20% of shares each, and two owners have 15% of shares each. -Is managed by one local director. -Has between 10 and 50 employees one month after the commencement of operations, all of them domestic nationals. -Has start-up capital of 10 times income per capita. -Has an estimated turnover of at least 100 times income per capita. -Leases the commercial plant or offices and is not a proprietor of real estate. -Has an annual lease for the office space equivalent to one income per capita. -Is in an office space of approximately 929 square meters (10,000 square feet). -Has a company deed that is 10 pages long. |
| <p>Cost required to complete each procedure (% of income per capita)</p> <ul style="list-style-type: none"> • Official costs only, no bribes • No professional fees unless services required by law or commonly used in practice | <p>The owners:</p> <ul style="list-style-type: none"> -Have reached the legal age of majority and are capable of making decisions as an adult. If there is no legal age of majority, they are assumed to be 30 years old. -Are in good health and have no criminal record. -Are married, the marriage is monogamous and registered with the authorities. -Where the answer differs according to the legal system applicable to the woman or man in question (as may be the case in economies where there is legal plurality), the answer used will be the one that applies to the majority of the population. |
| <p>Paid-in minimum capital (% of income per capita)</p> <ul style="list-style-type: none"> • Funds deposited in a bank or with third party before registration or up to 3 months after incorporation | |

Details - Starting a Business in Tokyo - Procedure, Time and Cost

| No. | Procedures | Time to Complete | Associated Costs |
|-----|---|---|---|
| 1 | <p>Search the company name <i>Agency</i> : Legal Affairs Bureau of the Ministry of Justice Under the Japanese Company Laws, entrepreneurs may not file an application for incorporating a company if the same company name and head office address are already registered. There is no need for entrepreneurs to check the uniqueness of the company name and make the name reservation at the Legal Affairs Bureau of the Ministry of Justice. Entrepreneurs usually check if the proposed company name and head office address has been registered. This can be easily be checked through books or personal computers installed and offered for searching at the Legal Affairs Bureaus or online at http://www1.touki.or.jp/gateway.html.</p> | Less than one day (online procedure) | no charge |
| 2 | <p>Make a company seal <i>Agency</i> : Seal maker A company seal is required by law: Article 20 of the Commercial Registration Act. The associated fee is JPY 10,000 for machine-carved seal or JPY 20,000 for hand-carved seal. The company seal must be registered at the Legal Affairs Bureau at the time of the incorporation under the Commercial Registration Act. An entrepreneur usually files the registration of the company seal as well as the registration of incorporation of the company with the competent Legal Affairs Bureau.</p> | 3 days | JPY 10,000 - JPY 20,000 |
| 3 | <p>Register the company at the Legal Affairs Bureau of the Ministry of Justice <i>Agency</i> : Legal Affairs Bureau of the Ministry of Justice To apply for registration, the entrepreneur must submit supporting documents with the application to the Legal Affairs Bureau headquarter or any of its branch offices designated in major cities, including:</p> <ul style="list-style-type: none"> - Articles of incorporation (signed by 5 entrepreneurs who contributed capital) - Application of seal registration - Letter of proxy (if company is registered by a lawyer or a judicial scrivener) - Personal seal of the executive member - Proof of paid-in capital (bank statement or letter from the company's representative certifying the receiving of capital contributions) - Proof of address - Confirmation of appointment of the company representative - Confirmation from company representative that he agrees to the appointment. <p>Additionally, the company's seal must be registered at the Legal Affairs Bureau of the Ministry of Justice upon registration of the company. The Certificate of corporation seal registration costs Yen 450.</p> <p>Once the filed documents are reviewed and approved, the company applies for the issuance of a company registration certificate. Normally, a judicial scrivener completes this registration procedure on behalf of the company.</p> <p>By virtue of the amended Commercial Registration Regulations in force since June 2004, company registration applications can be submitted online. To do so, the user must first obtain an electronic signature or a digital certification. There are two types of digital certifications: data file and IC card. The user must purchase an IC card reader to use the IC card system.</p> | 3 days | 0.7% of the capital amount or JPY 60,000, whichever is higher plus Yen 450 for the Certificate of corporation seal registration |
| 4 | <p>File the notification of company incorporation and the opening of a payroll office and apply for the approval of blue tax returns <i>Agency</i> : National Tax Agency A notification of the company incorporation must be filed to the Tax Agency (District Tax Office) within 2 months of the incorporation date. The notification of opening a payroll office must be filed within one month of the opening of a payroll office.</p> <p>As of January 2016, 13-digit "corporation identification numbers" (houjin bangou) must be indicated on (a) the notification of company incorporation, (b) notification of the opening of a payroll office and (c) application for the approval of blue tax returns. The application for the approval of blue tax returns must be filed either within 3 months of the incorporation date, or a day prior to the end of the first fiscal year, whichever comes first.</p> <p>Applicants can submit their application either online or in person.</p> | 1 day | no charge |
| 5 | <p>File the notification of commencement of business at the local tax office <i>Agency</i> : Local tax department of Tokyo Metropolitan Government A notification of commencement of business must be provided to the relevant authorities. If the head office of the company is located within Tokyo's 23 wards, the company must file a Notification for the Commencement of Business at the tax office of the Tokyo Metropolitan Government within 15 days of company incorporation.</p> <p>If the head office of the company is located outside Tokyo's 23 wards, the company must file a Notification of Incorporation at the tax office of the municipal government and the tax office of the prefectural government within 1 month of company incorporation.</p> | 1 day | no charge |

| | | | |
|---|---|-------|-----------|
| 6 | <p>File the labor insurance notifications and employment rules</p> <p><i>Agency</i> : Labor Standards Inspection Office</p> <p>Employees are automatically provided with labor insurance as soon as they are hired. Labor insurance usually includes employment and worker's compensation insurance.</p> <p>Upon recruitment, the company must file without delay the following documents at the competent Labor Standards Inspection Office:</p> <ul style="list-style-type: none"> • Notification of the application for labor insurance within 10 days of the insurance coverage commencement date • Notification of the approximate insurance contributions within 50 days of the insurance coverage commencement date • The rules of employment (once the company hires 10 or more employees) • Certificate of Registered Matters (Certificate of Company Registration) | 1 day | no charge |
| 7 | <p>File the applications for health insurance and public welfare pension</p> <p><i>Agency</i> : Japan Pension Service</p> <p>As soon as the company and its employees are covered for health insurance and public welfare pension, the company must file the following documents at the Social Insurance Office within 5 days of the business insurance coverage commencement date:</p> <ul style="list-style-type: none"> - Notification of the acquisition of insured status - The insurance details covering Health and Employee Pension insurance - Certificate of Registered Matters (Certificate of Company Registration) | 1 day | no charge |
| 8 | <p>File the company application for employment insurance</p> <p><i>Agency</i> : Public Employment Security Office</p> <p>The notification of the company's application for employment insurance must be filed at the Public Employment Security Office within 10 days of commencement of employment by the company.</p> <p>When a new employee is recruited, he/she is automatically insured under the company's employment insurance. The company must thus file a "Notification of Acquisition of Insured Status under Employment Insurance" at the Public Employment Security Office by the 10th day of the month immediately consecutive to that of the employee's appointment date.</p> | 1 day | no charge |

Dealing with Construction Permits

This topic tracks the procedures, time and cost to build a warehouse—including obtaining necessary the licenses and permits, submitting all required notifications, requesting and receiving all necessary inspections and obtaining utility connections. In addition, the Dealing with Construction Permits indicator measures the building quality control index, evaluating the quality of building regulations, the strength of quality control and safety mechanisms, liability and insurance regimes, and professional certification requirements. The most recent round of data collection was completed in May 2019. [See the methodology for more information](#)

What the indicators measure

Procedures to legally build a warehouse (number)

- Submitting all relevant documents and obtaining all necessary clearances, licenses, permits and certificates
- Submitting all required notifications and receiving all necessary inspections
- Obtaining utility connections for water and sewerage
- Registering and selling the warehouse after its completion

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day—though procedures that can be fully completed online are an exception to this rule
- Procedure is considered completed once final document is received
- No prior contact with officials

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes

Building quality control index (0-15)

- Quality of building regulations (0-2)
- Quality control before construction (0-1)
- Quality control during construction (0-3)
- Quality control after construction (0-3)
- Liability and insurance regimes (0-2)
- Professional certifications (0-4)

Case study assumptions

To make the data comparable across economies, several assumptions about the construction company, the warehouse project and the utility connections are used.

The construction company (BuildCo):

- Is a limited liability company (or its legal equivalent) and operates in the economy's largest business city. For 11 economies the data are also collected for the second largest business city.
- Is 100% domestically and privately owned; has five owners, none of whom is a legal entity. Has a licensed architect and a licensed engineer, both registered with the local association of architects or engineers. BuildCo is not assumed to have any other employees who are technical or licensed experts, such as geological or topographical experts.
- Owns the land on which the warehouse will be built and will sell the warehouse upon its completion.

The warehouse:

- Will be used for general storage activities, such as storage of books or stationery.
- Will have two stories, both above ground, with a total constructed area of approximately 1,300.6 square meters (14,000 square feet). Each floor will be 3 meters (9 feet, 10 inches) high and will be located on a land plot of approximately 929 square meters (10,000 square feet) that is 100% owned by BuildCo, and the warehouse is valued at 50 times income per capita.
- Will have complete architectural and technical plans prepared by a licensed architect. If preparation of the plans requires such steps as obtaining further documentation or getting prior approvals from external agencies, these are counted as procedures.
- Will take 30 weeks to construct (excluding all delays due to administrative and regulatory requirements).

The water and sewerage connections:

- Will be 150 meters (492 feet) from the existing water source and sewer tap. If there is no water delivery infrastructure in the economy, a borehole will be dug. If there is no sewerage infrastructure, a septic tank in the smallest size available will be installed or built.
- Will have an average water use of 662 liters (175 gallons) a day and an average wastewater flow of 568 liters (150 gallons) a day. Will have a peak water use of 1,325 liters (350 gallons) a day and a peak wastewater flow of 1,136 liters (300 gallons) a day.
- Will have a constant level of water demand and wastewater flow throughout the year; will be 1 inch in diameter for the water connection and 4 inches in diameter for the sewerage connection.

Details - Dealing with Construction Permits in Tokyo - Procedure, Time and Cost

| No. | Procedures | Time to Complete | Associated Costs |
|-----|--|------------------|------------------|
| 1 | <p>Obtain consent of neighborhood <i>Agency: Local Authority</i> BuildCo must post a sign board with specific information about the planned construction on the plot. BuildCo must obtain the non objection of neighbors and cannot begin construction until 30 days have elapsed.</p> | 30 days | no charge |
| ⇒ 2 | <p>Hold initial consultation with local authority <i>Agency: Local Authority</i> BuildCo must obtain clearance at the initial consultation phase with as many as 14 different departments at the prefecture level. The consultations are mandated by the the Building Standards Law of Japan (Law No.201 from May 24th 1950) and vary according to the prefecture.</p> | 24 days | no charge |
| 3 | <p>Obtain building permit from Japan Building Center <i>Agency: Japan Building Center</i> After the initial consultation with the local authority, BuildCo must submit a building permit application. A building official from the Japan Building Center shall, upon receiving an application, examine the plan for the building concerned as to whether it conforms to the provisions related to building regulations.</p> <p>Normally, architects submit the application on behalf of their clients. The Fire Office is also involved in the permit examination process. The application must be amended when any changes are made after the building permit is obtained.</p> | 21 days | JPY 225,000 |
| ⇒ 4 | <p>Request and obtain workmen's compensation insurance proof from Labor Control Office <i>Agency: Labor Control Office</i> BuildCo must submit the Labor insurance proof 10 days prior to the first day of construction. BuildCo must also submit the estimated insurance premiums declaration to the Labor Control Office within 20 days after the construction work starts and must pay the labor insurance premiums.</p> <p>No cost is incurred for obtaining confirmation. Worker compensation insurance is valid for a year, and it must be extended every year between April 1 and May 20. The Labor insurance for the construction industry is 0.2185% of the construction cost.</p> | 2 days | no charge |
| 5 | <p>Purchase and post statutory construction notice sign board <i>Agency: Local Authority</i> The construction notice sign board should include the following information:</p> <ul style="list-style-type: none"> • Construction company registry certificate number • Proof of worker compensation insurance • Building permit number • Name of client, designer, contractor, project name, address, the person in charge, etc. | 1 day | JPY 50,000 |
| 6 | <p>Submit construction method plan to local authority and obtain approval <i>Agency: Local Authority</i> The construction method plan is submitted to the local authority with the project drawings along with an application form. The local authorities have seven days to object to the final construction method plan. A water and sewerage request is included in the submission.</p> | 1 day | no charge |
| 7 | <p>Submit project safety and health and resources recycling plan to local authority and obtain approval <i>Agency: Local Authority</i> According to the Building Recycling Law, BuildCo must submit the project safety, health and resources recycling plan to the local authorities seven days before the first day of construction.</p> | 1 day | no charge |

| | | | |
|----|---|---------|-------------|
| 8 | <p>Conduct intermediate inspection and submit inspection report to the Japan Building Center</p> <p><i>Agency:</i> Japan Building Center</p> <p>The in-house engineer responsible for building quality control must inspect structural conditions and conduct new building position surveys when the construction is half-completed. The inspection report must be submitted to the Japan Building Center. Larger buildings require the Japan Building Center and the Fire Department to conduct an on site inspection.</p> | 2 days | JPY 211,000 |
| 9 | <p>Receive connection to water and sewage services</p> <p><i>Agency:</i> Tokyo Water Company</p> <p>The installation cost is included in water and sewerage charges.</p> | 21 days | no charge |
| 10 | <p>Request and receive final inspection from Japan Building Center</p> <p><i>Agency:</i> Japan Building Center</p> <p>A final inspection must be conducted by the Japan Building Center. If there are any outstanding issues pointed out by inspectors, remedial work must be completed and the building re-inspected before the completion certificate is issued.</p> | 1 day | JPY 220,000 |
| 11 | <p>Obtain completion certificate</p> <p><i>Agency:</i> Japan Building Center</p> <p>The completion certificate is required to start occupying and using the building.</p> | 18 days | no charge |
| 12 | <p>Register the building with the Land and Building Registry</p> <p><i>Agency:</i> Land and Building Registry</p> <p>The building registration involves two steps. First, the description of the building should be registered (usually through a notary public). This part cannot be done by BuildCo or its lawyer. No formal registration cost is required.</p> <p>Second, proof of building ownership should be registered. It takes about 10 to 14 days for the registration to be completed. The cost of proof of building ownership registration varies depending on the value of the building (0.2% of the building's taxable value).</p> | 12 days | JPY 450,250 |

⇒ Takes place simultaneously with previous procedure.

⚡ Getting Electricity

This topic measures the procedures, time and cost required for a business to obtain a permanent electricity connection for a newly constructed warehouse. Additionally, the reliability of supply and transparency of tariffs index measures reliability of supply, transparency of tariffs and the price of electricity. The most recent round of data collection for the project was completed in May 2019. [See the methodology for more information.](#)

What the indicators measure

Procedures to obtain an electricity connection (number)

- Submitting all relevant documents and obtaining all necessary clearances and permits
- Completing all required notifications and receiving all necessary inspections
- Obtaining external installation works and possibly purchasing material for these works
- Concluding any necessary supply contract and obtaining final supply

Time required to complete each procedure (calendar days)

- Is at least 1 calendar day
- Each procedure starts on a separate day
- Does not include time spent gathering information
- Reflects the time spent in practice, with little follow-up and no prior contact with officials

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes
- Value added tax excluded

The reliability of supply and transparency of tariffs index (0-8)

- Duration and frequency of power outages (0-3)
- Tools to monitor power outages (0-1)
- Tools to restore power supply (0-1)
- Regulatory monitoring of utilities' performance (0-1)
- Financial deterrents limiting outages (0-1)
- Transparency and accessibility of tariffs (0-1)

Price of electricity (cents per kilowatt-hour)*

- Price based on monthly bill for commercial warehouse in case study

*Note: *Doing Business* measures the price of electricity, but it is not included in the ease of doing business score nor in the ranking on the ease of getting electricity.

Case study assumptions

To make the data comparable across economies, several assumptions about the warehouse, the electricity connection and the monthly consumption are used.

The warehouse:

- Is owned by a local entrepreneur and is used for storage of goods.
- Is located in the economy's largest business city. For 11 economies the data are also collected for the second largest business city.
- Is located in an area where similar warehouses are typically located and is in an area with no physical constraints. For example, the property is not near a railway.
- Is a new construction and is being connected to electricity for the first time.
- Has two stories with a total surface area of approximately 1,300.6 square meters (14,000 square feet). The plot of land on which it is built is 929 square meters (10,000 square feet).

The electricity connection:

- Is a permanent one with a three-phase, four-wire Y connection with a subscribed capacity of 140-kilo-volt-ampere (kVA) with a power factor of 1, when 1 kVA = 1 kilowatt (kW).
- Has a length of 150 meters. The connection is to either the low- or medium-voltage distribution network and is either overhead or underground, whichever is more common in the area where the warehouse is located and requires works that involve the crossing of a 10-meter road (such as by excavation or overhead lines) but are all carried out on public land. There is no crossing of other owners' private property because the warehouse has access to a road.
- Does not require work to install the internal wiring of the warehouse. This has already been completed up to and including the customer's service panel or switchboard and the meter base.

The monthly consumption:

- It is assumed that the warehouse operates 30 days a month from 9:00 a.m. to 5:00 p.m. (8 hours a day), with equipment utilized at 80% of capacity on average and that there are no electricity cuts (assumed for simplicity reasons) and the monthly energy consumption is 26,880 kilowatt-hours (kWh); hourly consumption is 112 kWh.
- If multiple electricity suppliers exist, the warehouse is served by the cheapest supplier.
- Tariffs effective in January of the current year are used for calculation of the price of electricity for the warehouse. Although January has 31 days, for calculation purposes only 30 days are used.

Getting Electricity - Tokyo

Standardized Connection

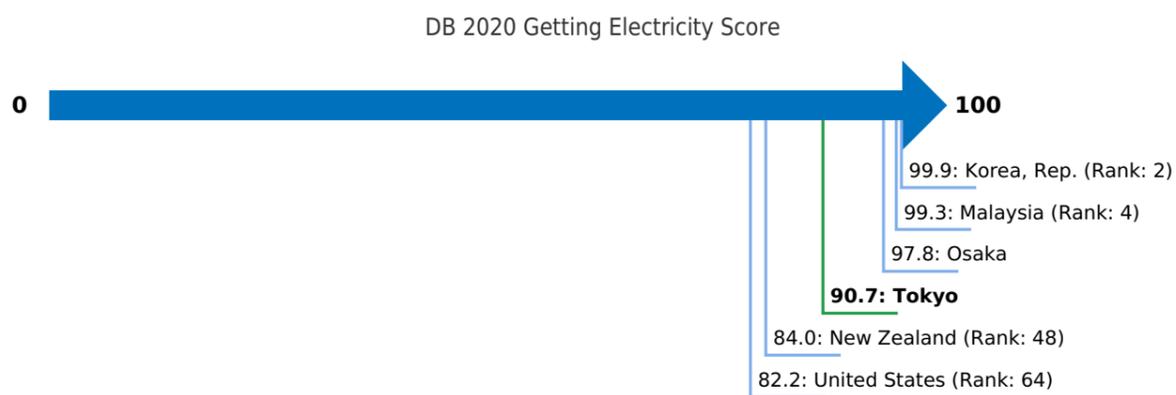

| | |
|---|---|
| Name of utility | Tokyo Electric Power Company (TEPCO) Power Grid, Inc. |
| Price of electricity (US cents per kWh) | 23.7 |
| City Covered | Tokyo |

| Indicator | Tokyo | OECD high income | Best Regulatory Performance |

Figure - Getting Electricity in Tokyo and comparator economies - Measure of Quality

Details - Getting Electricity in Tokyo - Procedure, Time and Cost

| No. | Procedures | Time to Complete | Associated Costs |
|-----|---|------------------|------------------|
| 1 | <p>Submit application to TEPCO Power Grid, Inc. and await external connection works <i>Agency</i>: TEPCO Power Grid, Inc. Required documents for the application are single-line diagram, a lay-out of premise, harmonic calculation documents and application form. There is no external inspection. As there is no inspection of the internal wiring, TEPCO Power Grid, Inc. is asking the customer for the necessary information regarding the licensed electrician who did the internal wiring. Japanese laws require every owner/user to hire a licensed electrician to install the wiring. The information is submitted on the formatted application document and contains the name, license number and contact information of the electrician. There is no notarization needed for the documents, however the signature of the customer needs to be on the documents when applying online. The contractor building the warehouse will usually make an application for power supply and connection several months before the required date of the connection to allow TEPCO Power Grid, Inc. sufficient time to survey the proposed area in terms of electricity supply route and capacity required for the specific building. If the electricity main supply is not suitable, TEPCO Power Grid, Inc. will carry out necessary infrastructure work to provide the required utility services. There is usually no estimate prior to the determination of the actual contract start date. There is no connection fee: In case of overhead wiring, up to 1000 meters long, construction work does not require any financial responsibility by the customer.</p> | 93 calendar days | JPY 0 |
| 2 | <p>Receive connection works and meter installation by TEPCO Power Grid, Inc. <i>Agency</i>: TEPCO Power Grid, Inc. With this class of customer TEPCO Power Grid, Inc. provides electricity on high-voltage (6600V) power line. On the primary side, TEPCO Power Grid, Inc. builds an aerial high-voltage service wire with some related equipments such as pole-mounted switches, and on the secondary side of the transformer (usually 200V) it installs a meter at a specified location and connects it to the internal wiring system. TEPCO Power Grid, Inc. usually executes the external wiring construction and meter installation at the same time. All the material is provided by TEPCO Power Grid, Inc.</p> | 11 calendar days | JPY 0 |

→ Takes place simultaneously with previous procedure.

Details - Getting Electricity in Tokyo - Measure of Quality

| | Answer |
|---|---|
| Reliability of supply and transparency of tariff index (0-8) | 8 |
| Total duration and frequency of outages per customer a year (0-3) | 3 |
| System average interruption duration index (SAIDI) | 0.0 |
| System average interruption frequency index (SAIFI) | 0.0 |
| What is the minimum outage time (in minutes) that the utility considers for the calculation of SAIDI/SAIFI | 1.0 |
| Mechanisms for monitoring outages (0-1) | 1 |
| Does the distribution utility use automated tools to monitor outages? | Yes |
| Mechanisms for restoring service (0-1) | 1 |
| Does the distribution utility use automated tools to restore service? | Yes |
| Regulatory monitoring (0-1) | 1 |
| Does a regulator—that is, an entity separate from the utility—monitor the utility's performance on reliability of supply? | Yes |
| Financial deterrents aimed at limiting outages (0-1) | 1 |
| Does the utility either pay compensation to customers or face fines by the regulator (or both) if outages exceed a certain cap? | Yes |
| Communication of tariffs and tariff changes (0-1) | 1 |
| Are effective tariffs available online? | Yes |
| Link to the website, if available online | http://www.tepco.co.jp/ep/corporate/plan_h/index-j.html |
| Are customers notified of a change in tariff ahead of the billing cycle? | Yes |

Note:

If the duration and frequency of outages is 100 or less, the economy is eligible to score on the Reliability of supply and transparency of tariff index.

If the duration and frequency of outages is not available, or is over 100, the economy is not eligible to score on the index.

If the minimum outage time considered for SAIDI/SAIFI is over 5 minutes, the economy is not eligible to score on the index.

If the electricity main supply is not suitable, KEPCO will carry out necessary infrastructure work to provide the required utility services. There is usually no estimate prior to the determination of the actual contract start date. There is no connection fee.</p> | 30 calendar days | JPY 0 |
| ⇒ 2 | <p>Receive external site inspection by Kepco for preparing technical study <i>Agency: Kepco</i> The utility visits the location of the building and conducts external site inspection necessary for preparation of technical study. It is necessary that the customer is present on the plot during this inspection.</p> | 1 calendar day | JPY 0 |
| 3 | <p>Await and receive meter installation and final connection <i>Agency: Kepco</i> With this class of customer KEPCO provides electricity on high-voltage (6600V) power line. On the primary side, KEPCO builds an aerial high-voltage service wire with some related equipment such as pole-mounted switches, and on the secondary side of the transformer (usually 200V) it installs a meter at a specified location and connects it to the internal wiring system. All the material is provided by KEPCO free of charge because all costs are included in consumption charges.</p> | 8 calendar days | JPY 0 |

⇒ Takes place simultaneously with previous procedure.

Details - Getting Electricity in Osaka - Measure of Quality

| | Answer |
|---|---|
| Reliability of supply and transparency of tariff index (0-8) | 8 |
| Total duration and frequency of outages per customer a year (0-3) | 3 |
| System average interruption duration index (SAIDI) | 0.1 |
| System average interruption frequency index (SAIFI) | 0.1 |
| What is the minimum outage time (in minutes) that the utility considers for the calculation of SAIDI/SAIFI | 1.0 |
| Mechanisms for monitoring outages (0-1) | 1 |
| Does the distribution utility use automated tools to monitor outages? | Yes |
| Mechanisms for restoring service (0-1) | 1 |
| Does the distribution utility use automated tools to restore service? | Yes |
| Regulatory monitoring (0-1) | 1 |
| Does a regulator—that is, an entity separate from the utility—monitor the utility's performance on reliability of supply? | Yes |
| Financial deterrents aimed at limiting outages (0-1) | 1 |
| Does the utility either pay compensation to customers or face fines by the regulator (or both) if outages exceed a certain cap? | Yes |
| Communication of tariffs and tariff changes (0-1) | 1 |
| Are effective tariffs available online? | Yes |
| Link to the website, if available online | http://www.kepco.co.jp/english/ http://kepco.jp/biz http://kepco.jp/biz/oshirase/ |
| Are customers notified of a change in tariff ahead of the billing cycle? | Yes |

Note:

If the duration and frequency of outages is 100 or less, the economy is eligible to score on the Reliability of supply and transparency of tariff index.

If the duration and frequency of outages is not available, or is over 100, the economy is not eligible to score on the index.

If the minimum outage time considered for SAIDI/SAIFI is over 5 minutes, the economy is not eligible to score on the index.

Registering Property

This topic examines the steps, time and cost involved in registering property, assuming a standardized case of an entrepreneur who wants to purchase land and a building that is already registered and free of title dispute. In addition, the topic also measures the quality of the land administration system in each economy. The quality of land administration index has five dimensions: reliability of infrastructure, transparency of information, geographic coverage, land dispute resolution, and equal access to property rights. The most recent round of data collection for the project was completed in May 2019. [See the methodology for more information.](#)

What the indicators measure

Procedures to legally transfer title on immovable property (number)

- Preregistration procedures (for example, checking for liens, notarizing sales agreement, paying property transfer taxes)
- Registration procedures in the economy's largest business city.
- Postregistration procedures (for example, filling title with municipality)

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day - though procedures that can be fully completed online are an exception to this rule
- Procedure is considered completed once final document is received
- No prior contact with officials

Cost required to complete each procedure (% of property value)

- Official costs only (such as administrative fees, duties and taxes).
- Value Added Tax, Capital Gains Tax and illicit payments are excluded

Quality of land administration index (0-30)

- Reliability of infrastructure index (0-8)
- Transparency of information index (0-6)
- Geographic coverage index (0-8)
- Land dispute resolution index (0-8)
- Equal access to property rights index (-2-0)

Case study assumptions

To make the data comparable across economies, several assumptions about the parties to the transaction, the property and the procedures are used.

The parties (buyer and seller):

- Are limited liability companies (or the legal equivalent).
- Are located in the periurban (that is, on the outskirts of the city but still within its official limits) area of the economy's largest business city. For 11 economies the data are also collected for the second largest business city.
- Are 100% domestically and privately owned.
- Perform general commercial activities.

The property (fully owned by the seller):

- Has a value of 50 times income per capita, which equals the sale price.
- Is fully owned by the seller.
- Has no mortgages attached and has been under the same ownership for the past 10 years.
- Is registered in the land registry or cadastre, or both, and is free of title disputes.
- Is located in a periurban commercial zone (that is, on the outskirts of the city but still within its official limits), and no rezoning is required.
- Consists of land and a building. The land area is 557.4 square meters (6,000 square feet). A two-story warehouse of 929 square meters (10,000 square feet) is located on the land. The warehouse is 10 years old, is in good condition, has no heating system and complies with all safety standards, building codes and legal requirements. The property, consisting of land and building, will be transferred in its entirety.
- Will not be subject to renovations or additional construction following the purchase.
- Has no trees, natural water sources, natural reserves or historical monuments of any kind.
- Will not be used for special purposes, and no special permits, such as for residential use, industrial plants, waste storage or certain types of agricultural activities, are required.
- Has no occupants, and no other party holds a legal interest in it.

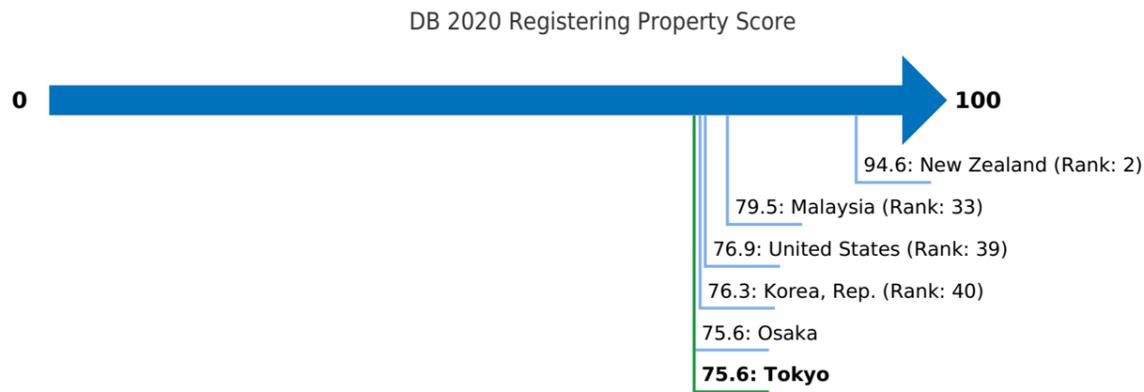

Registering Property - Tokyo

| Indicator | Tokyo | OECD high income | Best Regulatory Performance |
|---|-------|------------------|-----------------------------|
| Procedures (number) | 6 | 4.7 | 1 (5 Economies) |
| Time (days) | 13 | 23.6 | 1 (2 Economies) |
| Cost (% of property value) | 5.3 | 4.2 | 0.0 (Saudi Arabia) |
| Quality of the land administration index (0-30) | 25.5 | 23.2 | None in 2018/19 |

Figure - Registering Property in Tokyo - Score

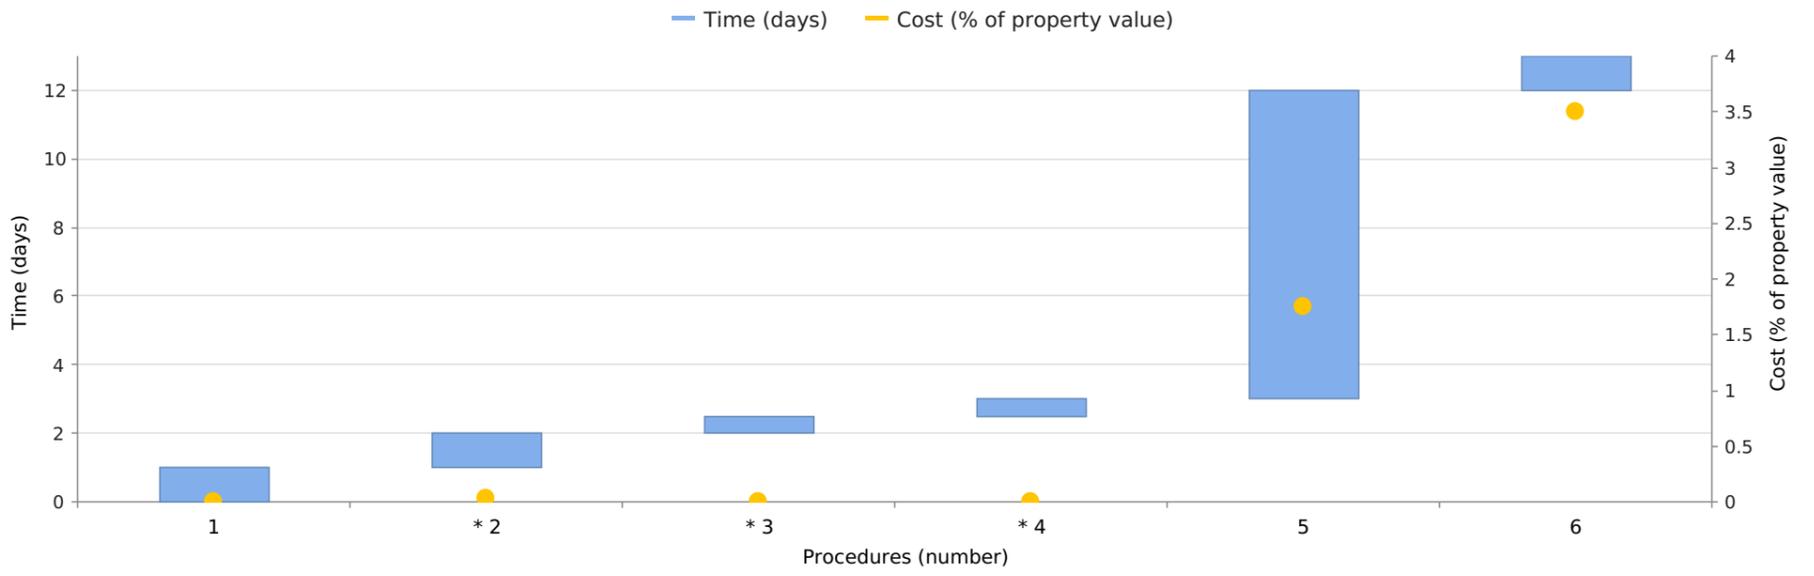

Figure - Registering Property in Tokyo and comparator economies - Ranking and Score

Note: The ranking of economies on the ease of registering property is determined by sorting their scores for registering property. These scores are the simple average of the scores for each of the component indicators.

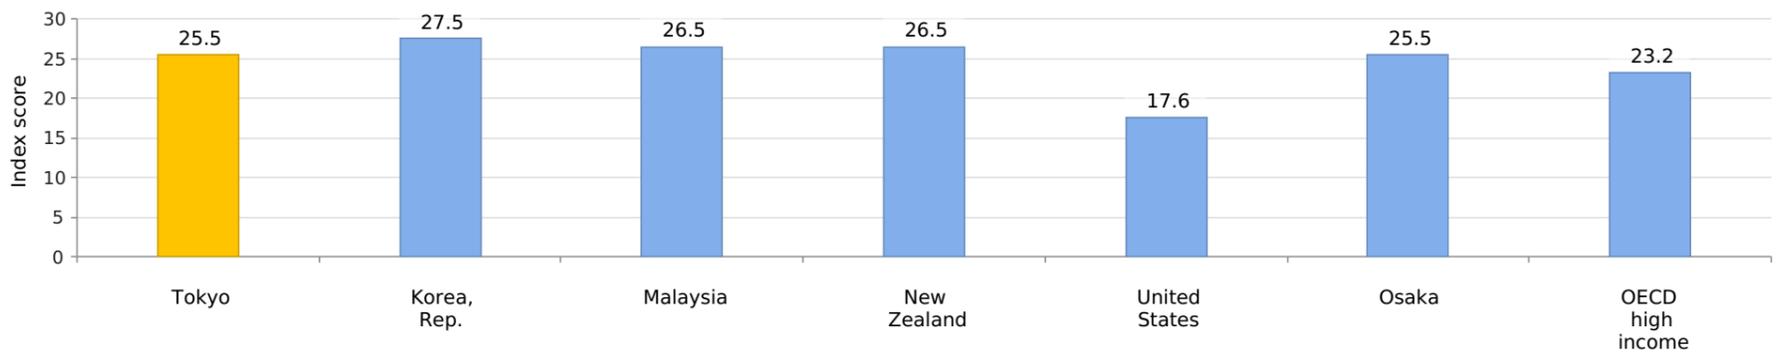

Figure - Registering Property in Tokyo - Procedure, Time and Cost

*This symbol is shown beside procedure numbers that take place simultaneously with the previous procedure.

Note: Online procedures account for 0.5 days in the total time calculation. For economies that have a different procedure list for men and women, the graph shows the time for women. For more information on methodology, see the *Doing Business* website (<http://doingbusiness.org/en/methodology>). For details on the procedures reflected here, see the summary below.

Figure - Registering Property in Tokyo and comparator economies - Measure of Quality

Details - Registering Property in Tokyo - Procedure, Time and Cost

| No. | Procedures | Time to Complete | Associated Costs |
|-----|---|---------------------------|--|
| 1 | <p>The seller obtains a certificate of evaluation for fixed asset tax of the real property at a local tax office <i>Agency: Tax Authority</i> The owner of the property must obtain the latest certificate of evaluation for fixed asset tax of the real property before to apply for registration. Registration license tax will be calculated based on the most updated value resulting from evaluation. The certificate is obtained from the relevant local tax authority.</p> | 1 day | JPY 500; (JPY 400 for land + JPY 100 for building (for two or more certificates of the same type of the certificate in one application, it will cost JPY 100 per certificate from the second certificate)) |
| ⇒ 2 | <p>Prepare the sale agreement and obtain the stamp tax <i>Agency: Legal Affairs Bureau, post offices or convenience stores</i> It is not a legal requirement for title registration to prepare a written sales agreement. However, it is common in practice to make the agreement between the parties. The agreement is subject to the stamp tax. Taxpayers can buy stamps in various places such as post offices, Legal Affairs Bureaus and convenience stores and receive an imprint on the agreement.</p> | 1 day | JPY 60,000 |
| ⇒ 3 | <p>Obtain a corporate registry certificate <i>Agency: Legal Affairs Bureau</i> The parties (as companies) obtain a corporate registry certificate issued within 3 months before the registration application. In November 2015, the Real Property Registration Order was revised. As a result, the parties can submit the corporate identification number for title registration instead of the certificate. However, it is still common to obtain the certificate for due diligence. The certificate is obtained at the Legal Affairs Bureau.</p> | Less than one day, online | JPY 960; (JPY 480 each copy (Applying online and obtaining the certificate at the Legal Affairs Bureau), JPY 500 each copy (Applying online and receiving the certificate by post), JPY 600 each copy (applying and obtaining the certificate at the Legal Affairs Bureau)) Two copies needed (480x2)) |
| ⇒ 4 | <p>Obtain a certificate of Seller's seal impression (inkan shomei) <i>Agency: Legal Affairs Bureau</i> The seller must obtain a certificate of its seal impression to be attached to the application for registration of transfer of the title. The certificate must be issued within 3 months before the application. It can be obtained from the Legal Affairs Bureau.</p> | Less than one day, online | JPY 780; (JPY 390 for each copy (Applying online and obtaining the certificate at the Legal Affairs Bureau), JPY 410 for each copy (Applying online and receiving the certificate by post), JPY 450 for each copy (applying and obtaining the certificate at the Legal Affairs Bureau)). Two copies needed (390x2)) |

| | | | |
|---|--|--------|--|
| 5 | <p>File an application at the Legal Affairs Bureau <i>Agency</i> : Legal Affairs Bureau</p> <p>An application for registration is filed at the Legal Affairs Bureau. The Legal Affairs Bureau will register the title under the name of the new owner. The parties can apply for the registration by themselves. However, it is common to retain a judicial scrivener (Shiho-Shoshi) for the application because the registration process requires legal knowledge. The registration and license tax are paid at the Legal Affairs Bureau.</p> <p>There is an 8% (from April 2014) consumption tax in Japan. Sales or leases of land are exempted from consumption tax. However, sales or leases of buildings are subject to consumption tax. In case the transaction includes the sales or lease of the building, the consumption tax is imposed only on the price of the building.</p> <p>The application can be made online. However, most of the attachments necessary for the application should be submitted to the Legal Affairs Bureau by mail or in person. It takes between 7 and 10 days.</p> <p>The necessary documents for the application are:</p> <ul style="list-style-type: none"> • Information certifying the reason of registration • Certificate of registration of seller's title of the real property (Toukizumi kenri sho) or registration identification code (Touki shikibetsu johu) (Already in his possession) • Certificate of corporate registry or corporate identification numbers of the parties (if any of them is a corporation) (obtained in Procedure 3) • Certificate of the seller's seal impression (obtained in Procedure 4) • Certificate of evaluation for fixed asset tax of the real property (obtained in Procedure 1) • Power of attorney of the parties (if a judicial scrivener applies for the registration on behalf of any of the parties) | 9 days | JPY 3,939,687.52; (2% of building value + 1.5% of land value evaluated for fixed asset tax (registration and license tax)) |
| 6 | <p>Payment of the real property acquisition tax <i>Agency</i> : Metropolitan Tax Office</p> <p>This is a post-closing matter. The purchaser will receive a tax paper from the Metropolitan taxation office after the registration. The real property acquisition tax must be paid by the deadline stated on the tax paper at the tax office.</p> <p>4% is the normal tax rate. Since 2006, the 3% reduced tax rate is applicable for lands and residential buildings. The reduced rate is applied from April 1, 2006, to March 31, 2021 unless the law providing such reduced rate is extended.</p> | 1 day | JPY 7,879,375.04; (4 % of building value + 3 % of land value) |

→Takes place simultaneously with previous procedure.

| | |
|---|-----|
| Do unmarried men and unmarried women have equal ownership rights to property? | Yes |
|---|-----|

| | | |
|---|-----|-----|
| Do married men and married women have equal ownership rights to property? | Yes | 0.0 |
|---|-----|-----|

Getting Credit

This topic explores two sets of issues—the strength of credit reporting systems and the effectiveness of collateral and bankruptcy laws in facilitating lending. The most recent round of data collection for the project was completed in May 2019. [See the methodology for more information.](#)

What the indicators measure

Strength of legal rights index (0-12)

- Rights of borrowers and lenders through collateral laws (0-10)
- Protection of secured creditors' rights through bankruptcy laws (0-2)

Depth of credit information index (0-8)

- Scope and accessibility of credit information distributed by credit bureaus and credit registries (0-8)

Credit bureau coverage (% of adults)

- Number of individuals and firms listed in largest credit bureau as a percentage of adult population

Credit registry coverage (% of adults)

- Number of individuals and firms listed in credit registry as a percentage of adult population

Case study assumptions

Doing Business assesses the sharing of credit information and the legal rights of borrowers and lenders with respect to secured transactions through 2 sets of indicators. The depth of credit information index measures rules and practices affecting the coverage, scope and accessibility of credit information available through a credit registry or a credit bureau. The strength of legal rights index measures the degree to which collateral and bankruptcy laws protect the rights of borrowers and lenders and thus facilitate lending. For each economy it is first determined whether a unitary secured transactions system exists. Then two case scenarios, case A and case B, are used to determine how a nonpossessory security interest is created, publicized and enforced according to the law. Special emphasis is given to how the collateral registry operates (if registration of security interests is possible). The case scenarios involve a secured borrower, company ABC, and a secured lender, BizBank.

In some economies the legal framework for secured transactions will allow only case A or case B (not both) to apply. Both cases examine the same set of legal provisions relating to the use of movable collateral.

Several assumptions about the secured borrower (ABC) and lender (BizBank) are used:

- ABC is a domestic limited liability company (or its legal equivalent).
- ABC has up to 50 employees.
- ABC has its headquarters and only base of operations in the economy's largest business city. For 11 economies the data are also collected for the second largest business city.
- Both ABC and BizBank are 100% domestically owned.

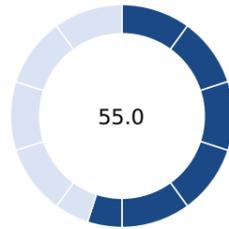

The case scenarios also involve assumptions. In case A, as collateral for the loan, ABC grants BizBank a nonpossessory security interest in one category of movable assets, for example, its machinery or its inventory. ABC wants to keep both possession and ownership of the collateral. In economies where the law does not allow nonpossessory security interests in movable property, ABC and BizBank use a fiduciary transfer-of-title arrangement (or a similar substitute for nonpossessory security interests).

In case B, ABC grants BizBank a business charge, enterprise charge, floating charge or any charge that gives BizBank a security interest over ABC's combined movable assets (or as much of ABC's movable assets as possible). ABC keeps ownership and possession of the assets.

Getting Credit - Tokyo

Does an integrated or unified legal framework for secured transactions that extends to the creation, publicity and enforcement of functional equivalents to security interests in movable assets exist in the economy? No

Does the law allow businesses to grant a non possessory security right in a single category of movable assets, without requiring a specific description of collateral? Yes

Does the law allow businesses to grant a non possessory security right in substantially all of its assets, without requiring a specific description of collateral? No

May a security right extend to future or after-acquired assets, and does it extend automatically to the products, proceeds and replacements of the original assets? No

Is a general description of debts and obligations permitted in collateral agreements; can all types of debts and obligations be secured between parties; and can the collateral agreement include a maximum amount for which the assets are encumbered? Yes

Is a collateral registry in operation for both incorporated and non-incorporated entities, that is unified geographically and by asset type, with an electronic database indexed by debtor's name? No

Does a notice-based collateral registry exist in which all functional equivalents can be registered? No

Does a modern collateral registry exist in which registrations, amendments, cancellations and searches can be performed online by any interested third party? No

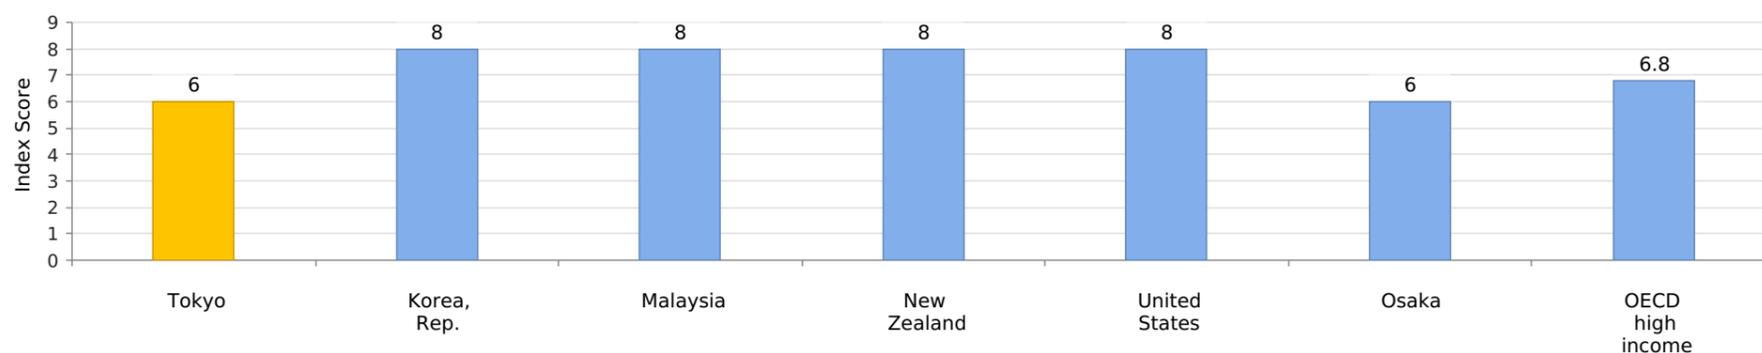

Are secured creditors paid first (i.e. before tax claims and employee claims) when a debtor defaults outside an insolvency procedure? Yes

Are secured creditors paid first (i.e. before tax claims and employee claims) when a business is liquidated? Yes

Are secured creditors subject to an automatic stay on enforcement when a debtor enters a court-supervised reorganization procedure? Does the law protect secured creditors' rights by providing clear grounds for relief from the stay and sets a time limit for it? No

Does the law allow parties to agree on out of court enforcement at the time a security interest is created? Does the law allow the secured creditor to sell the collateral through public auction or private tender, as well as, for the secured creditor to keep the asset in satisfaction of the debt? Yes

Protecting Minority Investors

This topic measures the strength of minority shareholder protections against misuse of corporate assets by directors for their personal gain as well as shareholder rights, governance safeguards and corporate transparency requirements that reduce the risk of abuse. The most recent round of data collection for the project was completed in May 2019. [See the methodology for more information.](#)

What the indicators measure

- **Extent of disclosure index (0-10):** Disclosure, review, and approval requirements for related-party transactions
- **Extent of director liability index (0-10):** Ability of minority shareholders to sue and hold interested directors liable for prejudicial related-party transactions; Available legal remedies (damages, disgorgement of profits, disqualification from managerial position(s) for one year or more, rescission of the transaction)
- **Ease of shareholder suits index (0-10):** Access to internal corporate documents; Evidence obtainable during trial and allocation of legal expenses
- **Extent of conflict of interest regulation index (0-30):** Sum of the extent of disclosure, extent of director liability and ease of shareholder suits indices
- **Extent of shareholder rights index (0-6):** Shareholders' rights and role in major corporate decisions
- **Extent of ownership and control index (0-7):** Governance safeguards protecting shareholders from undue board control and entrenchment
- **Extent of corporate transparency index (0-7):** Corporate transparency on ownership stakes, compensation, audits and financial prospects
- **Extent of shareholder governance index (0-20):** Sum of the extent of shareholders rights, extent of ownership and control and extent of corporate transparency indices
- **Strength of minority investor protection index (0-50):** Sum of the extent of conflict of interest regulation and extent of shareholder governance indices

Case study assumptions

To make the data comparable across economies, a case study uses several assumptions about the business and the transaction.

The business (Buyer):

- Is a publicly traded corporation listed on the economy's most important stock exchange.
- Has a board of directors and a chief executive officer (CEO) who may legally act on behalf of Buyer where permitted, even if this is not specifically required by law.
- Has a supervisory board in economies with a two-tier board system on which Mr. James appointed 60% of the shareholder-elected members.
- Has not adopted bylaws or articles of association that go beyond the minimum requirements. Does not follow codes, principles, recommendations or guidelines that are not mandatory.
- Is a manufacturing company with its own distribution network.

The transaction involves the following details:

- Mr. James owns 60% of Buyer, sits on Buyer's board of directors and elected two directors to Buyer's five-member board.
- Mr. James also owns 90% of Seller, a company that operates a chain of retail hardware stores. Seller recently closed a large number of its stores.
- Mr. James proposes that Buyer purchase Seller's unused fleet of trucks to expand Buyer's distribution of its food products, a proposal to which Buyer agrees. The price is equal to 10% of Buyer's assets and is higher than the market value.
- The proposed transaction is part of the company's principal activity and is not outside the authority of the company.
- Buyer enters into the transaction. All required approvals are obtained, and all required disclosures made—that is, the transaction was not entered into fraudulently.
- The transaction causes damages to Buyer. Shareholders sue Mr. James and the executives and directors that approved the transaction.

Paying Taxes

This topic records the taxes and mandatory contributions that a medium-size company must pay or withhold in a given year, as well as the administrative burden of paying taxes and contributions and complying with postfiling procedures (VAT refund and tax audit). The most recent round of data collection for the project was completed in May 2019 covering for the Paying Taxes indicator calendar year 2018 (January 1, 2018 - December 31, 2018). [See the methodology for more information.](#)

What the indicators measure

Tax payments for a manufacturing company in 2018 (number per year adjusted for electronic and joint filing and payment)

- Total number of taxes and contributions paid or withheld, including consumption taxes (value added tax, sales tax or goods and service tax)
- Method and frequency of filing and payment

Time required to comply with 3 major taxes (hours per year)

- Collecting information, computing tax payable
- Preparing separate tax accounting books, if required
- Completing tax return, filing with agencies
- Arranging payment or withholding

Total tax and contribution rate (% of commercial profits)

- Profit or corporate income tax
- Social contributions, labor taxes paid by employer
- Property and property transfer taxes
- Dividend, capital gains, financial transactions taxes
- Waste collection, vehicle, road and other taxes

Postfiling Index

- Time to comply with VAT refund (hours)
- Time to obtain VAT refund (weeks)
- Time to comply with a corporate income tax correction (hours)
- Time to complete a corporate income tax correction (weeks)

Case study assumptions

Using a case scenario, *Doing Business* records taxes and mandatory contributions a medium size company must pay in a year, and measures the administrative burden of paying taxes, contributions and dealing with postfiling processes. Information is also compiled on frequency of filing and payments, time taken to comply with tax laws, time taken to comply with the requirements of postfiling processes and time waiting.

To make data comparable across economies, several assumptions are used:

- TaxpayerCo is a medium-size business that started operations on January 1, 2017. It produces ceramic flowerpots and sells them at retail. All taxes and contributions recorded are paid in the second year of operation (calendar year 2018). Taxes and mandatory contributions are measured at all levels of government.

The VAT refund process:

- In June 2018, TaxpayerCo. makes a large capital purchase: the value of the machine is 65 times income per capita of the economy. Sales are equally spread per month (1,050 times income per capita divided by 12) and cost of goods sold are equally expensed per month (875 times income per capita divided by 12). The machinery seller is registered for VAT and excess input VAT incurred in June will be fully recovered after four consecutive months if the VAT rate is the same for inputs, sales and the machine and the tax reporting period is every month. Input VAT will exceed Output VAT in June 2018.

The corporate income tax audit process:

- An error in calculation of income tax liability (for example, use of incorrect tax depreciation rates, or incorrectly treating an expense as tax deductible) leads to an incorrect income tax return and a corporate income tax underpayment. TaxpayerCo. discovered the error and voluntarily notified the tax authority. The value of the underpaid income tax liability is 5% of the corporate income tax liability due. TaxpayerCo. submits corrected information after the deadline for submitting the annual tax return, but within the tax assessment period.

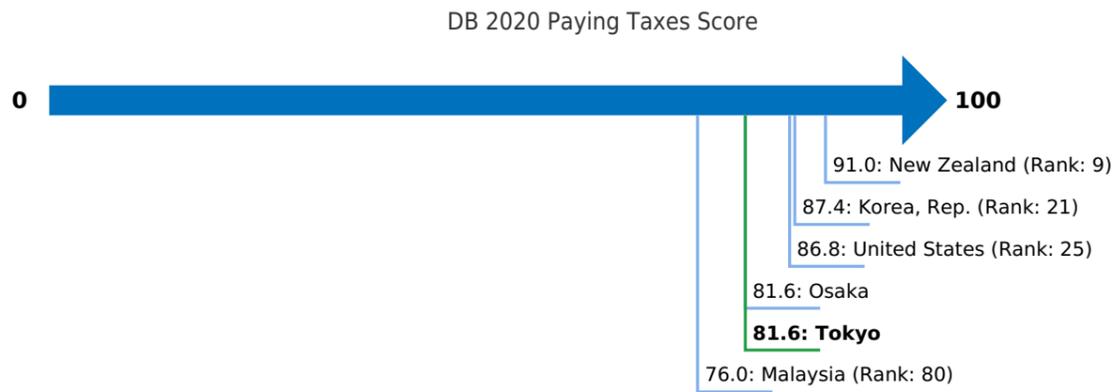

Paying Taxes - Tokyo

| Indicator | Tokyo | OECD high income | Best Regulatory Performance |
|---|-------|------------------|-----------------------------|
| Payments (number per year) | 19 | 10.3 | 3 (2 Economies) |
| Time (hours per year) | 129 | 158.8 | 49 (3 Economies) |
| Total tax and contribution rate (% of profit) | 46.7 | 39.9 | 26.1 (33 Economies) |
| Postfiling index (0-100) | 95.2 | 86.7 | None in 2018/19 |

Figure - Paying Taxes in Tokyo - Score

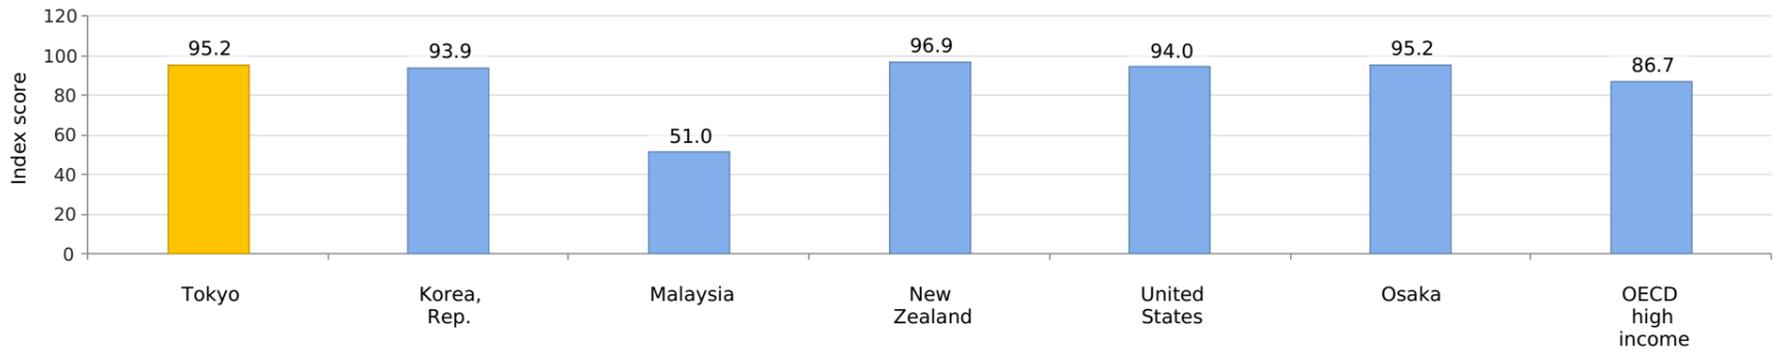

Figure - Paying Taxes in Tokyo and comparator economies - Ranking and Score

Note: The ranking of economies on the ease of paying taxes is determined by sorting their scores for paying taxes. These scores are the simple average of the scores for each of the component indicators, with a threshold and a nonlinear transformation applied to one of the component indicators, the total tax and contribution rate. The threshold is defined as the total tax and contribution rate at the 15th percentile of the overall distribution for all years included in the analysis up to and including Doing Business 2015, which is 26.1%. All economies with a total tax and contribution rate below this threshold receive the same score as the economy at the threshold.

Trading across Borders

Doing Business records the time and cost associated with the logistical process of exporting and importing goods. *Doing Business* measures the time and cost (excluding tariffs) associated with three sets of procedures—documentary compliance, border compliance and domestic transport—within the overall process of exporting or importing a shipment of goods. The most recent round of data collection for the project was completed in May 2019. [See the methodology for more information.](#)

What the indicators measure

Documentary compliance

- Obtaining, preparing and submitting documents during transport, clearance, inspections and port or border handling in origin economy
- Obtaining, preparing and submitting documents required by destination economy and any transit economies
- Covers all documents required by law and in practice, including electronic submissions of information

Border compliance

- Customs clearance and inspections
- Inspections by other agencies (if applied to more than 20% of shipments)
- Handling and inspections that take place at the economy's port or border

Domestic transport

- Loading or unloading of the shipment at the warehouse or port/border
- Transport between warehouse and port/border
- Traffic delays and road police checks while shipment is en route

Case study assumptions

To make the data comparable across economies, a few assumptions are made about the traded goods and the transactions:

Time: Time is measured in hours, and 1 day is 24 hours (for example, 22 days are recorded as $22 \times 24 = 528$ hours). If customs clearance takes 7.5 hours, the data are recorded as is. Alternatively, suppose documents are submitted to a customs agency at 8:00a.m., are processed overnight and can be picked up at 8:00a.m. the next day. The time for customs clearance would be recorded as 24 hours because the actual procedure took 24 hours.

Cost: Insurance cost and informal payments for which no receipt is issued are excluded from the costs recorded. Costs are reported in U.S. dollars. Contributors are asked to convert local currency into U.S. dollars based on the exchange rate prevailing on the day they answer the questionnaire. Contributors are private sector experts in international trade logistics and are informed about exchange rates.

Assumptions of the case study:

- For all 190 economies covered by *Doing Business*, it is assumed a shipment is in a warehouse in the largest business city of the exporting economy and travels to a warehouse in the largest business city of the importing economy.

- It is assumed each economy imports 15 metric tons of containerized auto parts (HS 8708) from its natural import partner—the economy from which it imports the largest value (price times quantity) of auto parts. It is assumed each economy exports the product of its comparative advantage (defined by the largest export value) to its natural export partner—the economy that is the largest purchaser of this product. Shipment value is assumed to be \$50,000.

- The mode of transport is the one most widely used for the chosen export or import product and the trading partner, as is the seaport or land border crossing.

- All electronic information submissions requested by any government agency in connection with the shipment are considered to be documents obtained, prepared and submitted during the export or import process.

- A port or border is a place (seaport or land border crossing) where merchandise can enter or leave an economy.

- Relevant government agencies include customs, port authorities, road police, border guards, standardization agencies, ministries or departments of agriculture or industry, national security agencies and any other government authorities.

Enforcing Contracts

The enforcing contracts indicator measures the time and cost for resolving a commercial dispute through a local first-instance court, and the quality of judicial processes index, evaluating whether each economy has adopted a series of good practices that promote quality and efficiency in the court system. The most recent round of data collection was completed in May 2019. [See the methodology for more information.](#)

What the indicators measure

Time required to enforce a contract through the courts (calendar days)

- Time to file and serve the case
- Time for trial and to obtain the judgment
- Time to enforce the judgment

Cost required to enforce a contract through the courts (% of claim value)

- Average attorney fees
- Court costs
- Enforcement costs

Quality of judicial processes index (0-18)

- Court structure and proceedings (-1-5)
- Case management (0-6)
- Court automation (0-4)
- Alternative dispute resolution (0-3)

Case study assumptions

The dispute in the case study involves the breach of a sales contract between two domestic businesses. The case study assumes that the court hears an expert on the quality of the goods in dispute. This distinguishes the case from simple debt enforcement.

To make the data on the time and comparable across economies, several assumptions about the case are used:

- The dispute concerns a lawful transaction between two businesses (Seller and Buyer), both located in the economy's largest business city. For 11 economies the data are also collected for the second largest business city.
- The Buyer orders custom-made furniture, then fails to pay alleging that the goods are not of adequate quality.
- The value of the dispute is 200% of the income per capita or the equivalent in local currency of USD 5,000, whichever is greater.
- The Seller sues the Buyer before the court with jurisdiction over commercial cases worth 200% of income per capita or \$5,000 whichever is greater.
- The Seller requests the pretrial attachment of the defendant's movable assets to secure the claim.
- The claim is disputed on the merits because of Buyer's allegation that the quality of the goods was not adequate.
- The judge decides in favor of the seller; there is no appeal.
- The Seller enforces the judgment through a public sale of the Buyer's movable assets.

Resolving Insolvency

Doing Business studies the time, cost and outcome of insolvency proceedings involving domestic legal entities. These variables are used to calculate the recovery rate, which is recorded as cents on the dollar recovered by secured creditors through reorganization, liquidation or debt enforcement (foreclosure or receivership) proceedings. To determine the present value of the amount recovered by creditors, *Doing Business* uses the lending rates from the International Monetary Fund, supplemented with data from central banks and the Economist Intelligence Unit. The most recent round of data collection was completed in May 2019. [See the methodology for more information.](#)

What the indicators measure

Time required to recover debt (years)

- Measured in calendar years
- Appeals and requests for extension are included

Cost required to recover debt (% of debtor's estate)

- Measured as percentage of estate value
- Court fees
- Fees of insolvency administrators
- Lawyers' fees
- Assessors' and auctioneers' fees
- Other related fees

Outcome

- Whether business continues operating as a going concern or business assets are sold piecemeal

Recovery rate for creditors

- Measures the cents on the dollar recovered by secured creditors
- Outcome for the business (survival or not) determines the maximum value that can be recovered
- Official costs of the insolvency proceedings are deducted
- Depreciation of furniture is taken into account
- Present value of debt recovered

Strength of insolvency framework index (0- 16)

- Sum of the scores of four component indices:
- Commencement of proceedings index (0-3)
- Management of debtor's assets index (0-6)
- Reorganization proceedings index (0-3)
- Creditor participation index (0-4)

Case study assumptions

To make the data on the time, cost and outcome comparable across economies, several assumptions about the business and the case are used:

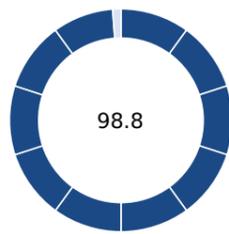

- A hotel located in the largest city (or cities) has 201 employees and 50 suppliers. The hotel experiences financial difficulties.
- The value of the hotel is 100% of the income per capita or the equivalent in local currency of USD 200,000, whichever is greater.
- The hotel has a loan from a domestic bank, secured by a mortgage over the hotel's real estate. The hotel cannot pay back the loan, but makes enough money to operate otherwise.

In addition, *Doing Business* evaluates the quality of legal framework applicable to judicial liquidation and reorganization proceedings and the extent to which best insolvency practices have been implemented in each economy covered.

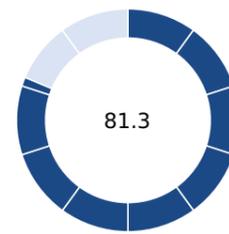

Resolving Insolvency - Tokyo

| Indicator | Tokyo | OECD high income | Best Regulatory Performance |

Note: Even if the economy's legal framework includes provisions related to insolvency proceedings (liquidation or reorganization), the economy receives 0 points for the strength of insolvency framework index, if time, cost and outcome indicators are recorded as "no practice."

Figure - Resolving Insolvency in Tokyo and comparator economies - Recovery Rate

Details - Resolving Insolvency in Tokyo

| Indicator | Answer | Score |
|-------------------------------------|----------------|--|
| Proceeding | reorganization | The most likely procedure applicable to our case study would be a reorganization (civil rehabilitation). Mirage may use the rehabilitation proceeding to gain time, find a new investor, or renegotiate its debt. The rehabilitation proceeding starts with Mirage (debtor) filing for court-supervised rehabilitation with the Tokyo District Court. Mirage's managers will draft a rehabilitation plan which is likely to be approved by creditors. BizBank will likely support the rehabilitation proceedings as according to the case assumption the continuation of Mirage's operations as a going concern would fetch 100% of Mirage's market value. |
| Outcome | going concern | Yes, the hotel will continue operating as a going concern after approval of the rehabilitation plan by creditors. |
| Time (in years) | 0.6 | According to the standard schedule of Tokyo District Court, civil rehabilitation proceedings will take approximately 6 to 7 months in total. Immediately after the filing, the court issues a temporary restraining order and supervision order. And, about 1 week after the filing, the court issues the order to commence civil rehabilitation proceedings. After that, creditors will file proofs of claim within about 1 month after the commencement order and Mirage will investigate the proofs of claim. In the meantime, Mirage will evaluate its properties and prepare the rehabilitation plan. The rehabilitation plan will be submitted 3 months after the commencement (the court designates the date). The supervisor will submit his opinion regarding the plan and a creditor's meeting will be convened to approve the plan about 5 months after the commencement. If the rehabilitation plan is approved in the creditor's meeting, the court will issue an order to confirm the approved plan immediately after the meeting. The rehabilitation plan becomes effective about 1 month after the confirmation order. |
| Cost (% of estate) | 4.5 | Cost incurred during the entire insolvency process mainly include court or government agency fees (1%), attorney fees (2%), costs of notification and publication (<1%), insolvency representative or receiver fees (1%), and fees of accountants, assessors, inspectors and other professionals (<1%). |
| Recovery rate (cents on the dollar) | | 91.8 |

Employing Workers

Doing Business presents detailed data for the employing workers indicators on the *Doing Business* website (<http://www.doingbusiness.org>). The study does not present rankings of economies on these indicators or include the topic in the aggregate ease of doing business score or ranking on the ease of doing business.

The most recent round of data collection was completed in May 2019. [See the methodology for more information.](#)

What the indicators measure

Hiring

(i) whether fixed-term contracts are prohibited for permanent tasks; (ii) maximum cumulative duration of fixed-term contracts; (iii) length of the maximum probationary period; (iv) minimum wage; (v) ratio of minimum wage to the average value added per worker.

Working hours

(i) maximum number of working days allowed per week; (ii) premiums for work: at night, on a weekly rest day and overtime; (iii) whether there are restrictions on work at night, work on a weekly rest day and for overtime work; (iv) length of paid annual leave.

Redundancy rules

(i) whether redundancy can be basis for terminating workers; (ii) whether employer needs to notify and/or get approval from third party to terminate 1 redundant worker and a group of 9 redundant workers; (iii) whether the law requires employer to reassign or retrain a worker before making worker redundant; (iv) whether priority rules apply for redundancies and reemployment.

Redundancy cost

(i) notice period for redundancy dismissal; (ii) severance payments, and (iii) penalties due when terminating a redundant worker. Data on the availability of unemployment protection for a worker with one year of employment is also collected.

Case study assumptions

To make the data comparable across economies, several assumptions about the worker and the business are used.

The worker:

- Is a cashier in a supermarket or grocery store, age 19, with one year of work experience.
- Is a full-time employee.
- Is not a member of the labor union, unless membership is mandatory.

The business:

- Is a limited liability company (or the equivalent in the economy).
- Operates a supermarket or grocery store in the economy's largest business city. For 11 economies the data are also collected for the second largest business city.
- Has 60 employees.
- Is subject to collective bargaining agreements if such agreements cover more than 50% of the food retail sector and they apply even to firms that are not party to them.
- Abides by every law and regulation but does not grant workers more benefits than those mandated by law, regulation or (if applicable) collective bargaining agreements.

Business Reforms in Japan

From May 2, 2018 to May 1, 2019, 115 economies implemented 294 business regulatory reforms across the 10 areas measured by Doing Business. Reforms inspired by *Doing Business* have been implemented by economies in all regions. The following are reforms implemented since *Doing Business* 2008.

✓ = *Doing Business* reform making it easier to do business. ✗ = Change making it more difficult to do business.

DB2018

✓ **Paying Taxes:** Japan made paying taxes less costly by reducing the statutory rate for corporate income tax and rates for other taxes including mandatory labor contributions. This reforms apply to Osaka and Tokyo.

DB2017

✓ **Getting Electricity:** Japan (Osaka) made getting electricity more efficient by introducing online application and eliminating preliminary consultation.

✓ **Paying Taxes:** Japan made paying taxes easier by disclosing the technical specifications of the eTax platform and allowing the upload of additional information in comma separated value (CSV) format. The restoration surtax was also abolished. However, a local corporation tax was introduced and the rates of special local corporation tax, inhabitants tax and enterprise tax were raised. Welfare pension premiums were also raised. These reforms apply to both Tokyo and Osaka. However, the rate for health insurance contributions paid by employers was reduced only in Osaka.

DB2013

✓ **Paying Taxes:** Japan made paying taxes less costly for companies by reducing the corporate income tax rate—though it also introduced a restoration surtax for a 3-year period.

DB2012

✗ **Dealing with Construction Permits:** Japan made dealing with construction permits costlier by increasing inspection fees.

DB2011

✓ **Paying Taxes:** Japan made paying taxes easier by introducing an online payment system for the health insurance contributions paid by the employer.

✓ **Resolving Insolvency:** Japan made it easier to deal with insolvency by establishing a new entity, the Enterprise Turnaround Initiative Corporation, to support the revitalization of companies suffering from excessive debt but professionally managed.

Doing Business 2020 is the 17th in a series of annual studies investigating the regulations that enhance business activity and those that constrain it. It provides quantitative indicators covering 12 areas of the business environment in 190 economies. The goal of the *Doing Business* series is to provide objective data for use by governments in designing sound business regulatory policies and to encourage research on the important dimensions of the regulatory environment for firms.
